

In case you missed it, Robert Weinerman of Iron Bridge Resources offered a series of live webinars in May and June that covered V1 Verification, changes to the FAFSA tax data items, and where to find FAFSA data on the tax returns. These webinars were offered as “update” or “redo” webinars and incorporated the changes FSA made to FAFSA processing since our earlier training. Robert recorded the webinars and they are available via the links below.

You can access these “Redo” webinar recordings at the links below. Each of these links brings you to a different registration page as each (unfortunately) requires a separate registration and approval process. You should get an email with your link to access the relevant recording within a day of your registration.

If you have any problems accessing the recordings, please reach out to Robert at robert@ironbridgeresources.com.
